

I-SPY VIEWFINDER

A viewfinder helps to frame what you can see around you by creating an image with a boundary. Use your viewfinder at Bunjil Place Gallery to discover different sections of the exhibition. Share your favourite frames of the exhibition with your parent/guardian.

TIP!

Try holding your viewfinder at arm's length, keeping your elbows straight. Now try looking for different views by getting low on the ground. Try different arm lengths, angles, and heights too.

TO TRY THIS
AT HOME:
Use your viewfinder to frame something you like, then use your pencils and paper to draw the image in the viewfinder.

The NEW BLACK VANGUARD

PHOTOGRAPHY between
ART and FASHION
